

Assignment 1

```
import pandas as pd
```

```
import numpy as np
```

```
df = pd.read_csv("C:/Users/Admin/Downloads/NEW DSBDA/matches.csv")
```

```
df.head(3)
```

```
df.tail(3)
```

```
df.shape
```

```
df.columns
```

```
df.info()
```

```
df.isnull().sum()
```

```
df[['team1', 'team2']]
```

```
df.describe()
```

```
df['winner']
```

```
df[['team1', 'winner']]
```

```
matches_2018 = df[df['season'] == 2018]
```

```
matches_2018
```

```
stadium_matches = df[df['venue'].str.contains("Rajiv Gandhi",na=False)]
```

```
stadium_matches
```

```
df['season'].nunique()
```

```
df.shape[0]
```

```
df['venue'].value_counts()
```

```
df['venue'].value_counts().head(5)
```
