

Assignment 2

```
import pandas as pd
```

```
import numpy as np
```

```
df = pd.read_csv("C:/Users/Admin/Downloads/NEW DSBDA/students.csv")
```

```
df.iloc[0:3]df.tail(3)
```

```
df.shape
```

```
df.columns
```

```
df.info()
```

```
df.isnull().sum()
```

```
df[['RollNo', 'Name']]
```

```
df.describe()
```

```
df['Name']
```

```
df['Marks'] = df['Marks'].fillna(df['Marks'].mean())
```

```
df
```

```
df.drop(['Age'], axis=1)
```

```
df[df['City'] == 'Pune']
```

```
len(df[df['City'] == 'Pune'])
```

```
state_count = df['State'].value_counts()
```

```
top5_states = state_count.head(5)
```

```
top5_states
```

```
state_count = df['State'].value_counts()
```

```
state_count
```

```
state_count.head(5)
```
